Description

Reverse Osmosis RO Water Filter Drinking Water Purifier System
Water Purifier Home

Reverse osmosis is a process in which a pressure higher than the osmotic pressure is used as a driving force, and the selective membrane is only permeable to water and cannot pass through the selective permeability of the solute, and the water molecules are separated from the solute phase from the water.

Technical Specs

Type	Reverse Osmosis Water Purifier
Color	Blue / Red/PINK/WHITE/any color you like
Rated Power	30W
Clean water output	7.8L/Hour
Delivery Detail	15-35 Days
Payment terms	L/C, T/T, Western Union, MoneyGram, Cash
Rated Voltage	220V/110V
Rated Frequency	50HZ/60Hz
Water pressure	0.15~0.3Mpa
Water temperature	4~40°C
Certificates	CE,CB,EMC,Rohs
FOB port	Guangzhou or Shenzhen
Packaging Details	Individual retail package. 2pcs/Master Carton.

A CUP OF PURE PURIFY YOUR BODY AND MIND

Professional filter core makes purified & direct drinking water

SR01 water purifier, take good care of family's water drinking

IS THE WATER IN YOUR FAMILY SAFE AND HEALTHY ?

The tap-water may contain the following substances
which can not be removed even if the water is boiled

TO EMBRACE FRESH AND PURE FUTURE

how can you miss SR01 water purifier?

TO EMBRACE FRESH AND PURE FUTURE

how can you miss SR01 water purifier?

HOMEMADE OF PURE WATER PRIVATE ENJOYMENT OF FAMILY

how can Suitable for municipal tap -water you miss SR01 water purifier?

Organic matter pollution

High turbidity

High hardness

Secondary water supply

taste of bleach power

Over proof of heavy metal

Longer water pipes

High quality water supply to meet the needs of water use in the kitchen

DRINK HEALTHY WATER GET CLOSER TO A PURE LIFE

Direct drinking

Make coffee

Make tea and milk

Brush Teeth and wash face

Cook rice and soup

BRILLIANT WHITE TEXTURE WITH GENTLEMANLY CHARACTER

Mini portable size, save space.

ABS material, Bright as new.
Simple appearance, Natural color

3 STAGES FILTRATION FILTER MORE THOROUGHLY

PAC composite filter + RO Reverse osmosis filter + Activated carbon filter

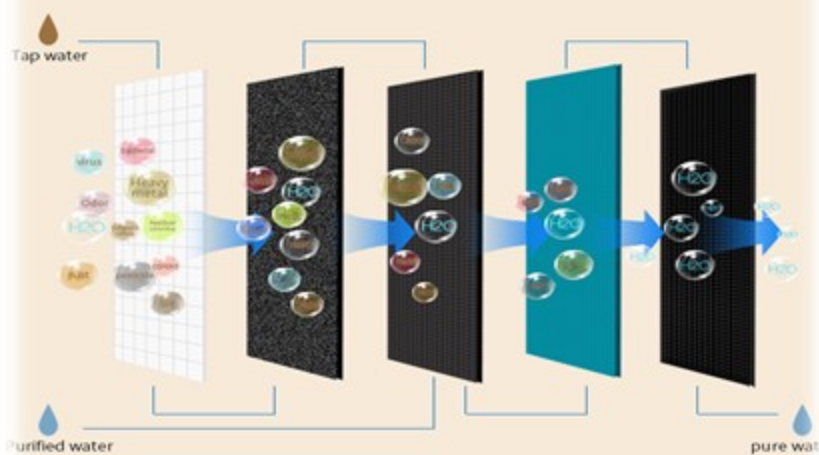

PAC composite filter

Activated carbon filter

RO Reverse osmosis filter

WE ALSO CARE FOR THE FAMILY'S HEALTH.

Effective filtration of heavy metals, such as heavy metals in water and other harmful substances by several layers of control, ensure every drop of water is fresh and sweet

PAC composite filter + RO Reverse osmosis filter + Activated carbon filter

SUBVERSION OF TRADITION SIMPLE ERA OF FILTER

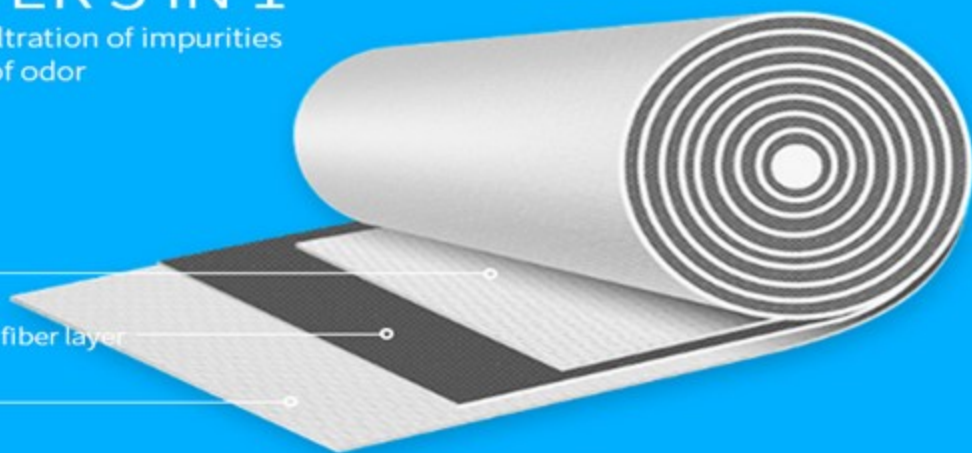

PAC COMPOSITE OF FILTER 3 IN 1

High efficiency filtration of impurities
and adsorption of odor

PP fiber layer

Activated carbon fiber layer

PP fiber layer

RO REVERSE OSMOSIS FILTER

filtration rate 0.001-0.0001 microns; Successful to intercept the organic matter
(Tri-chloromethane and carbon tetrachloride) and heavy metals (arsenic, lead, tin, etc.) in water.

Bacteria

0.4-0.5micron

Virus

0.01-0.1micron

Antibiotics

0.001-0.01micron

heavy metals

0.0005-0.005micron

Inorganic
substance

0.0002-0.0005micron

Organic
matter

molecular
weight is greater than 100

FAST WATER PRODUCTION

MAXIMUM WATER VOLUME OF 50 GALLONS PER DAY

FAST WATER PRODUCTION CAN MEET
THE NEEDS OF 6 PEOPLE IN THE FAMILY.

Simplified installation process, simple and safe and efficient

Adjust the pH of the water, to further improve the taste

All filter elements use quick connection mode, which is simple, convenient and easy to operate.

High capacity

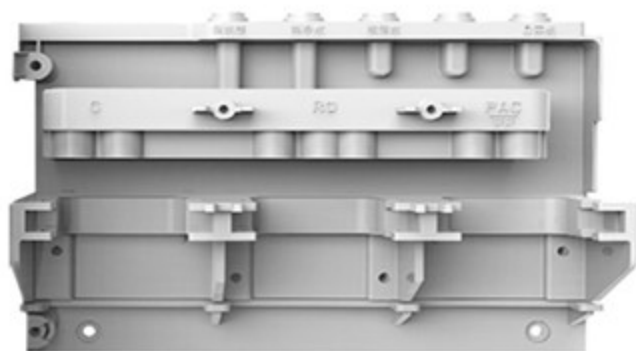

THE BUCKET CAN STORE
3 GALLONS OF WATER AT ONE TIME

Fast water production can meet the needs of 6 people in the family.

INTEGRATED WATER BOARD TO REDUCE THE HIDDEN DANGER OF WATER LEAKAGE

Ensure higher reliability, reduce hidden dangers of water leakage, increase service life

Simplified installation process, simple and safe and efficient

All filter elements use quick connection mode, which is simple, convenient and easy to operate.

RO reverse osmosis filter

Filtration accuracy up to 0.0001 micron

Intelligent control

Switch machine/filter reset One button to get

Postposition activated carbon filter

Adjust the PH value of the water to further improve the taste

New upgrades save water

1:1 ratio of low wastewater to more savings

Multi-stage filtration

Layer division of labor

1:1 LOW WASTE WATER RATE

new upgrade and more water saving

Before the upgrade

1 cup pure water 3 cups of waste water

New generation water saving technology

1 cup pure water 1 cup of waste water

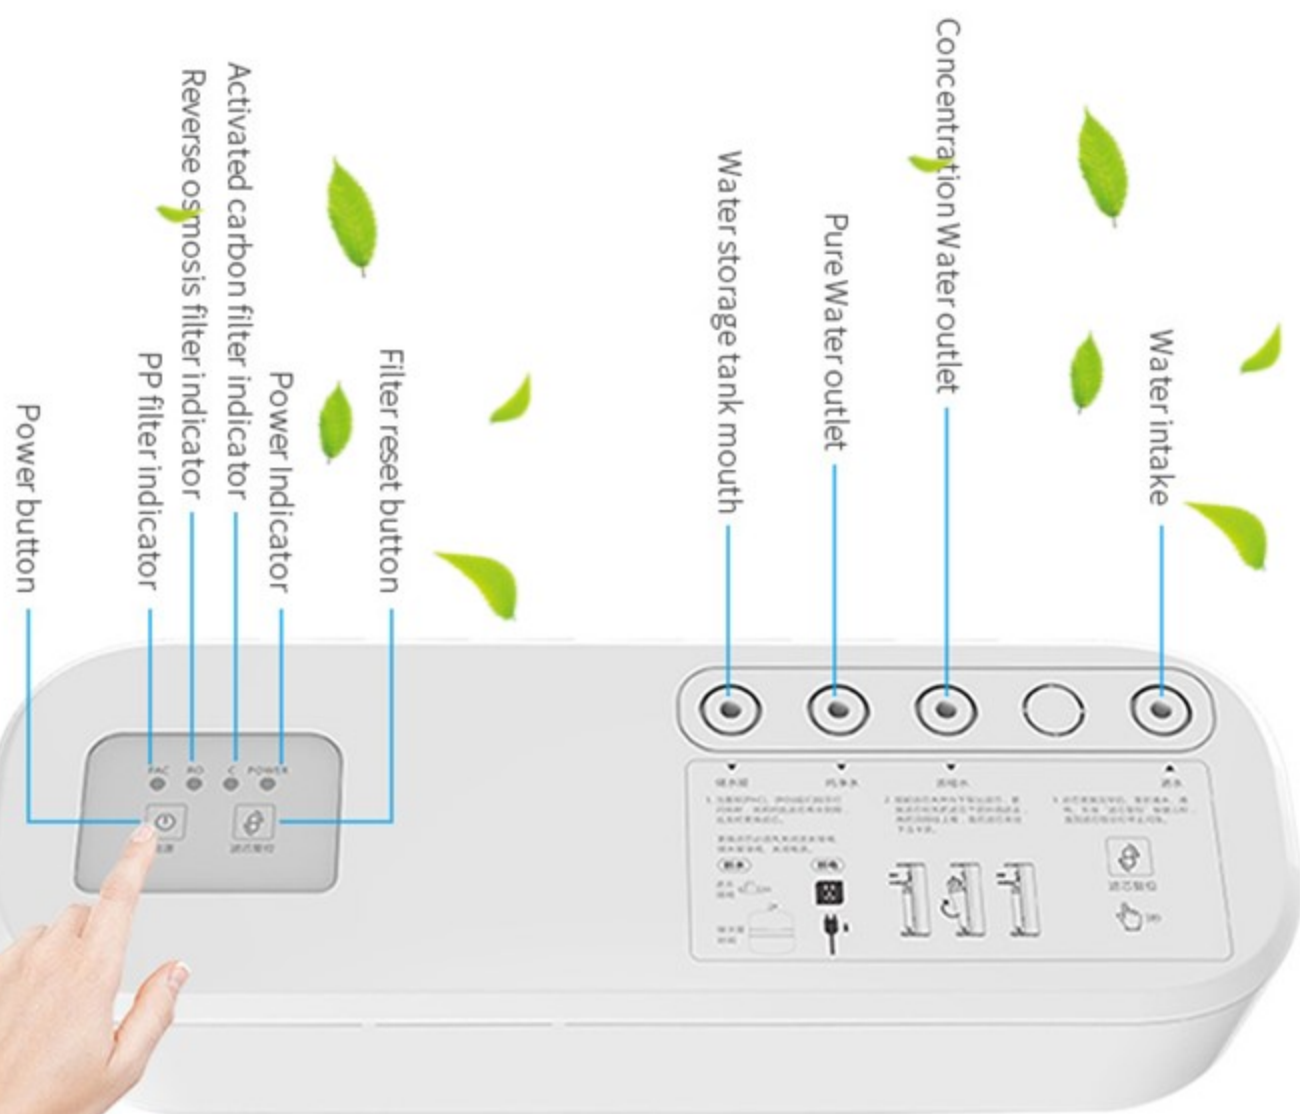

PROFICIENT IN DETAIL

[Immediately clean]

Power/Filer Reset , One button control

The system set up the maintenance function of the filter, when the filter reaches the service life, the indicator light will flash , the buzzer sends out the warning indication, reminding the replacement, make to usage more comfortable.

CLOSED TYPE PROTECTION COVER

Isolation from waterways to prevent leakage of electricity.

Rated Voltage: 24VDC

Rated Power: 30W

Power: 220V/50Hz

Suitable Temperature: 4-38°C

Net Weight: 5.5kg

Gross Weight : 10.5kg

Water flow: 0.13L/min

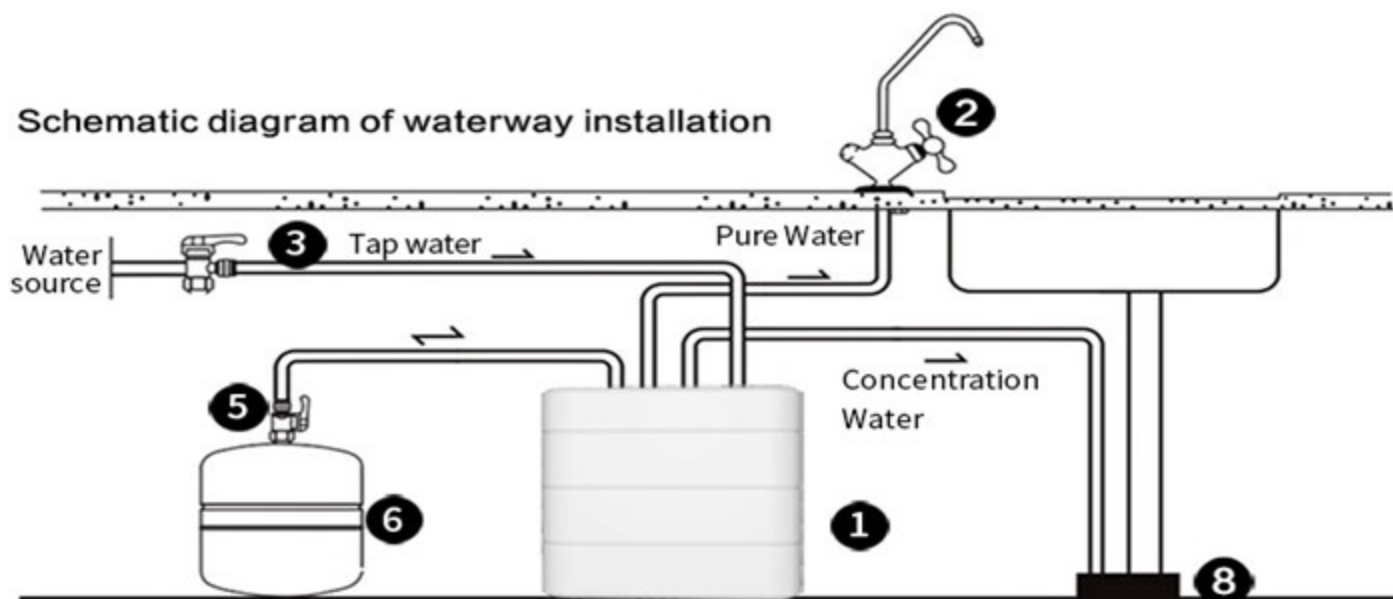

Working Pressure of RO membrane: 0.4-0.8MPa

Influent pressure: 0.1-0.4MPa

Water Source: Municipal tap water

Schematic diagram of waterway installation

DRINK HEALTHY WATER, START FROM GOOD FILTER
